

**UNITED GLOBAL MARINE**  
**EQUIPMENTS SERVICES - L.L.C**

*Marine Machinery Automation,  
Electrical, Instrumentation, HVAC  
& Mechanical Engineering Services.*

# About Us

United Global Marine Equipment Services is a trusted provider of comprehensive marine engineering and technical solutions, delivering excellence across Automation, Electrical, Instrumentation, HVAC, and Mechanical systems.

We specialize in supporting vessels, offshore platforms, and marine facilities with reliable, high-quality technical services designed to enhance operational performance, safety, and efficiency.

We are a team of experienced marine engineers, technicians, and technical specialists dedicated to maintaining and optimizing critical shipboard systems. With strong industry knowledge and hands-on expertise, we deliver solutions that minimize downtime and maximize reliability. Our approach combines technical precision, innovative thinking, and strict adherence to international marine standards.

## OUR CORE SERVICES

### Marine Automation

- PLC & control systems
- Engine monitoring systems
- Alarm & safety systems
- Automation panel troubleshooting
- Bridge equipments

### Marine Electrical Systems

- Electrical troubleshooting & repair
- Generator control systems
- Switchboard maintenance
- Power distribution systems
- HVAC troubleshooting & maintenance
- Fabrication & retrofit solutions

### Marine Instrumentation

- Pressure & temperature transmitters
- Level and flow sensors
- Calibration & testing
- Alarm and monitoring devices
- Fire and gas detection safety system

### Engine Room Technical Support Preventive maintenance

- Preventive maintenance
- Engine room automation diagnostics
- System fault finding
- Technical inspection services

# Our Services

## Marine Control, Automation & Instrumentation

Installation, repair, and optimization of PLC systems, control panels, monitoring systems, and critical marine instrumentation for seamless vessel operations.

## Auxiliary Generators & Electrical Systems

Complete servicing of auxiliary generators, electrical panels, distribution boards, and shipwide wiring to ensure stable and safe onboard power.

## Marine Engine & Propulsion Services

Expert maintenance and troubleshooting for main engines, CPP systems, and gearboxes. We ensure reliable performance and smooth vessel propulsion.

## Steering, Winch & Thruster Systems

Professional repair and troubleshooting of steering gear units, hydraulic winches, and bow thrusters to ensure safe maneuverability and efficient vessel handling.

# Your Trusted Partner In Marine Automation, Electrical, Instrumentation, HVAC & Mechanical Engineering Services

## Industry Expertise

Serving marine industry from past 13 years experience UAE ports and international marine automation, electrical and instrumentation systems, we deliver reliable solutions tailored to vessel operations of all types.

## Customer-Centered Service

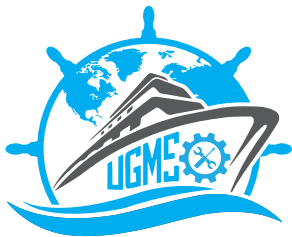

We listen, understand your vessel's requirements, and provide services that focus on long-term performance, reliability, and customer satisfaction.

## Integrity & Quality Workmanship

Experienced Marine Engineers, Fast Technical Support, Reliable Marine Solutions, Onshore, Offshore & Drydocks, Advanced Diagnostic Tools, Commitment to Safety & Quality

## 24/7 Marine Support

Marine issues can occur anytime, so our team is available around the clock to provide emergency repairs, troubleshooting, and technical assistance whenever you need it.
